

A smiling male mechanic with short brown hair and a light beard, wearing a blue polo shirt over a white t-shirt, is looking down at a tablet computer he is holding. The background is a blurred car repair shop with various tools and equipment. In the top right corner, the word "mitchell" is written in a bold, lowercase, sans-serif font, with "AN ENLYTE COMPANY" in a smaller, uppercase, sans-serif font below it. On the left side of the image, there are several white curved lines that appear to be part of a graphic design element.

**mitchell**

AN ENLYTE COMPANY

**Mitchell RepairCenter™**

## **Streamline Your Auto Physical Damage Repair Business**

If you want to generate more profit by better managing your repairs, your customer satisfaction and your business, there's only one solution that gives you all the tools you need—Mitchell RepairCenter.

# What You Need to Know All on One Screen

At-a-glance overview of job details on a single screen.

## Parts Management

Track parts ordered and received, part price changes and credits due.

The screenshot displays the Mitchell Repair Center software interface. At the top, there's a navigation bar with tabs like History, Jobs, Tasks, Labor, Accounting, Analytics, Reports, Library, How To, and Help. Below this is a sub-navigation bar with tabs for Overview, Admin & Vehicle, Repair Lines, Parts, Sublets, Services, Labor, Attachments, Notes, Amount Due, Job Cost, Web Status, and Te... The main content area is divided into several sections: Admin & Vehicle (Customer, Vehicle, Insurance, Agent, Claim), Repair Lines (Estimate, Non-Estimate, Total, Estimator, Estimate Source), Production (Parts, Sublets, Job Dates, Labor), and Services. The Labor section includes a table with columns for Department, Estimate, Assigned, Flagged, Actual, and Technicians.

## Business Analysis Tools Without Equal

Access the most powerful set of business analysis and reporting tools in the industry.

## Track Labor

Track labor progress by department.

## Track Costs

Instantly view job costs vs. your goals, plus balances.

Get started with your **FREE** RepairCenter download.

## Includes

- › TechAdvisor™ OEM Repair Standards for Ford, GM & Chrysler
- › Online Repair Status
- › Compatibility with All Major Estimating Systems
- › 30-Day Trial of TechAdvisor Repair, Parts & Labor

### **Manage The Repair Process**

Mitchell TechAdvisor provides integrated access to critical OEM repair data and procedures, allowing technicians to quickly locate the information they need to restore today's complex vehicles to pre-accident condition. Production management and scheduling tools help to improve your overall Repair Order processes, while integrated estimating and parts management help you complete accurate repairs on time.

### **Manage Labor Resources**

Maintain productive and motivated employees by accurately booking and paying labor through integrated work processes and financial tools. Easily assign, track and flag labor time for payroll and job costing.

### **Financial Tools Maximize Profitability**

RepairCenter's powerful business management functionality allows you to track your work processes, providing real-time insight and analysis into your financial performance—empowering you to make informed business decisions. RepairCenter's key performance indicators (KPIs) roll up into dashboard viewing for easy sharing and analysis, providing clarity when and where you need it. Reduce your administrative burden with seamless integration with all major accounting packages.

### **Increase Efficiency & Reduce Errors**

RepairCenter's ToolStore brings the auto collision industry's most important partners right into your workflow through powerful apps. These add-ons enable a seamless flow of information between RepairCenter and third-party partners—saving you the hassle of re-keying information and the need to manage multiple accounts—thus streamlining your workflow and minimizing errors.

### **Monitor The Repair Stage**

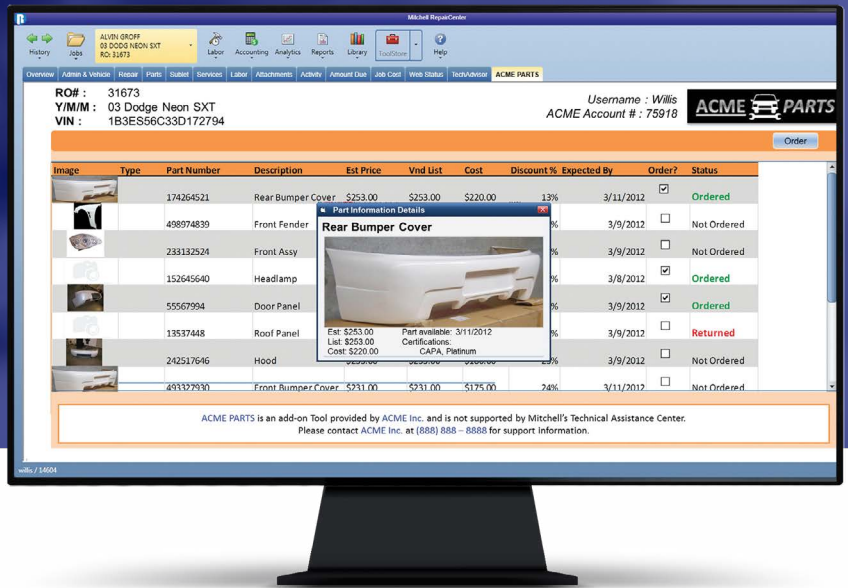

Monitor where your vehicles are in the repair process with the redesigned Production Management module. The user-friendly visual format allows you to move vehicles in and out of repair stages easily and efficiently—while keeping track of your work-in-progress and staying informed.

### **Reduce Your IT Overhead**

RepairCenter is available in a secure hosted environment. You simply download the application right to your desktop with your chosen functionality already enabled. Built-in RepairCenter how-to videos and free online training at mitchellu.com allow you to learn and explore the powerful functionality at your own pace and save on both time and up-front implementation costs.

## Mitchell RepairCenter™ Tool Store

Your dynamic workspace where the entire industry—customers, shops and solution providers—come together in one simple, unified workflow tool.

ToolStore	Explore and enable add-on tools from within your RepairCenter workspace.
Seamless Data Integration	No data rekey and no file uploads. State-of-the-art web services allow for seamless data integration.
Intuitive Workflow	Leverage add-on tools within the repair context for optimized workflow integration.
Embedded UI	Access third-party vendor solutions from within the RepairCenter workspace for a single sign on, fully embedded user experience.

# Improving at the Speed of Mitchell

"With RepairCenter, we now have the ability to track technician's time, report on estimator's batting average, but most importantly, push and pull information from our in-house system."

— Kevin Jamieson  
Surgenor Chevrolet, Buick, GMC, Cadillac  
Ottawa, Ontario
